Ideation Phase
Empathize & Discover

Date	10 march 2026
Team ID	
Project Name	UCABS-Cab Booking System
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool that helps teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

In the context of UCABS – Cab Booking System, this tool helps the team understand both passengers and drivers, their motivations, pain points, and needs while using the cab booking platform. This ensures that the solutions designed are user-centered, efficient, and address real-world challenges faced during transportation.
