Project Name	Cab booking
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The **Problem–Solution Fit** means identifying a real problem faced by users and ensuring that the proposed solution effectively solves that problem. In the context of a **cab booking system**, many users face difficulties such as finding available cabs quickly, high waiting times, lack of fare transparency, and safety concerns.

This project focuses on providing a **smart and efficient cab booking platform** that connects passengers with nearby drivers through a simple digital interface. The system allows users to book rides instantly, track the driver in real time, view estimated fares, and make secure online payments.

Purpose:

1. Solve Transportation Problems
Provide users with a quick and reliable way to book cabs without the need to search manually for transportation.

2. Reduce Waiting Time
Use location-based services to connect users with the nearest available drivers.

3. Improve Fare Transparency
Display estimated fares before confirming the ride so that users are aware of the cost.

4. Enhance Safety and Trust
Provide driver details, ride tracking, and ratings to ensure passenger safety and build trust.

5. Improve User Experience
Offer a simple and easy-to-use platform for booking rides, tracking trips, and making payments.

6. Increase Efficiency in Urban Transportation
Optimize driver-passenger matching to reduce idle time for drivers and waiting time for passengers.

Template:

Problem – Solution Fit Canvas (Cab Booking System)	
Target Customers	Daily commuters, office workers, students, travelers, and people who need quick transportation within the city.
Customer Problems	1. Difficulty finding cabs quickly. 2. Long waiting times for transpoortation. 3. Unclear or unfair fare pricing. 4. Safety concerns while traveling. 5. Lack of real-time tracking of the cab.
Current Alternatives	Traditional taxi services, auto rickshaws, public transport (bus/metro), existing ride-hailing apps.
Proposed Solution	A **Smart Cab Booking System** that allows users to book cabs instantly through a mobile or web application, track the driver in real time, view estimated fares, and make secure digital payments.
Key Features	1. Real-time cab booking. 2. GPS-based driver tracking. 3. Fare estimation before booking. 4. Driver details and ratings for safety. 5. Multiple payment options (UPI, card, wallet).
Value Proposition	Provides fast, safe, and reliable transportation with transparent pricing and real-time tracking, improving the overall commuting experience.
Benefits for Customers	Reduced waiting time, convenient booking, safe travel, fair pricing, and easy digital payments.
Success Indicators	Increase in number of bookings, positive customer ratings, reduced ride waiting time, and high user satisfaction.
